

## What is BTEC IT?

A new generation course that combines up-to-date industry knowledge with practical and research work.

## Why study BTEC IT?

- Exciting new units to study like **Social Media in Business**
- Lots of different units so you're always learning new things
- It can lead to a lucrative job in IT
- Teaches you skills to succeed in higher education
- Project-based assessments – less written exams than A-level
- Yet you can still achieve the equivalent of two A-levels if you **choose to study the Diploma**

## Units

| <b>Extended Certificate (=1 A-level)</b>       | <b>Diploma (=2 A-levels)</b>              |
|--|---|
| Information Technology Systems ( <i>exam</i> ) | <i>Extended Certificate units plus...</i> |
| <b>Using Social Media in Business</b>          | <b>Website Development</b>                |
| Data Modelling                                 | IT Project Management                     |
| Creating Systems to Manage Information         | Programming                               |
|  | Cyber Security and Incident Management    |
