

Music Technology Enrichment

Music Technology is a great way to continue being part of the music department without taking the full Music A Level. These lessons will show you how to use the Music studio in the department as well as the software Cubase 7.5.

We will be recording live music, composing, editing samples and learning how to mix live sound. You will be able to take part in school concerts, using the mixing desk in the hall.

We will take on a project each half term which will incorporate the learning of how to mix, edit and compose. The projects will include composing music for film, creating beats using sounds recorded around the school and a Christmas Jingle project.

If you are interested and would like more information please come and see me.

Natalie Browne, Head of Music
